ALUMINIUM SOLUTIONS FOR
SLATS &
FENCING

Australian made extrusions that fabricators, manufacturers, and installers need to deliver premium fencing and screening systems.

The demand for modern aluminium fencing, screening and privacy solutions continues to grow across residential, commercial and architectural projects. Customers expect products that are durable, low maintenance, visually appealing and built to withstand Australia's harsh conditions.

For almost 90 years, Capral has supplied Australian manufacturers and fabricators with high-quality aluminium products. Our local manufacturing footprint, national distribution network and extensive product range make us a trusted partner for fencing, screening and outdoor living specialists across Australia.

Capral offers a wide range of aluminium products, stocked locally for the fencing and screening industry.

Standard Extrusions, Angles & Geometrics

Our broad range of stocked extrusions includes angles, channels, t-sections, and more — ready for immediate dispatch from our national distribution network. These versatile profiles are essential for modular builds, offering structural flexibility and compatibility across a wide range of applications.

Perforated and Security Mesh & Screens

Our perforated aluminium products provide a versatile solution for privacy screening, sun control, ventilation and architectural features, while our Amplimesh® security screen systems deliver trusted security, durability and performance. Available in a range of finishes, colours and configurations, these solutions combine functionality, aesthetics and long-term reliability for modern fencing, screening and outdoor living applications.

Rolled Products

Capral supplies high-quality aluminium sheet, plate, and coil — ideal for cladding, lining, flashings, and roofing elements. Lightweight, corrosion-resistant, and easy to fabricate, they're a reliable solution for modular home exteriors and interior details.

Quiklok Aluminium Fencing System

Designed for speed of installation, strength, durability and visual appeal, aluminium Capral's Quiklok fence and screening system provides modern privacy solutions for residential, commercial and public spaces.

Custom Extrusion Designs

Need something tailored? Capral offers custom aluminium extrusions designed to your exact specifications. Perfect for modular chassis, framing systems, or integration features — built to support efficient manufacturing, repeatability, and strength.

Decorative Screening Solutions

Capral's aluminium sheet products provide the ideal foundation for decorative screening applications. Aluminium sheet can be CNC cut, laser cut or router cut into custom patterns and designs, allowing fabricators complete design freedom. Combined with Capral's powder coating capabilities, decorative screens can be finished in a wide range of architectural colours and textures to deliver outstanding aesthetics and long-term durability.

Services that streamline your manufacturing process.

Capral understands that fencing and screening manufacturers rely on dependable supply, consistent quality and responsive service.

Capral's nationwide distribution footprint ensures reliable supply to your manufacturing facility, wherever you're located. With multiple distribution centres across Australia and dedicated account support, we work closely with your team to manage lead times, logistics, and changing demand.

Our in-house technical specialists are available to support your projects from concept to completion. Whether you're navigating compliance requirements, developing new profiles, or looking to optimise materials usage, our experts can provide guidance tailored to fencing, screening and outdoor living applications.

We also offer project-specific fabrication services — including cutting, drilling, and punching — that reduce time and labour on your production line. These value-added services can help you improve speed, reduce waste, and increase installation accuracy in the field.

Flexible Ordering and Nationwide Delivery Options

Capral offers you multiple ways to conveniently source aluminium products and services tailored to your needs:

- Work directly with a **dedicated account manager** who can provide personalised support throughout your project, helping you select the right products and manage timelines
- Visit one of our local **Aluminium Trade Centres** for expert advice, product demonstrations, and fast pick-up.
- Our **online store** is available 24/7 for quick and easy ordering, allowing you to place orders anytime from anywhere. Capral's robust national distribution network ensures fast and reliable delivery direct to your factory or construction site nationwide.

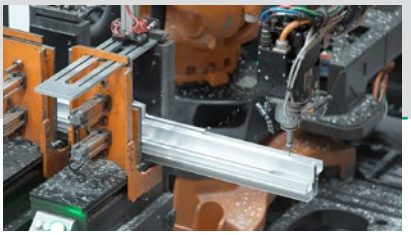

Finishing Options That Fit Your Vision

A high-performance finish doesn't just protect — it elevates. Capral offers in-house powder coating through certified Dulux and Akzo Nobel applicators, giving you access to a wide range of architectural colours and finishes suitable for coastal and inland conditions alike.

Our powder coating services are available nationally and designed to support short lead times — ideal for fast-moving modular build programs.

Whether you're aiming for bold colour statements or subtle tones that blend with the natural landscape, we can help you deliver a consistent, high-quality finish every time.

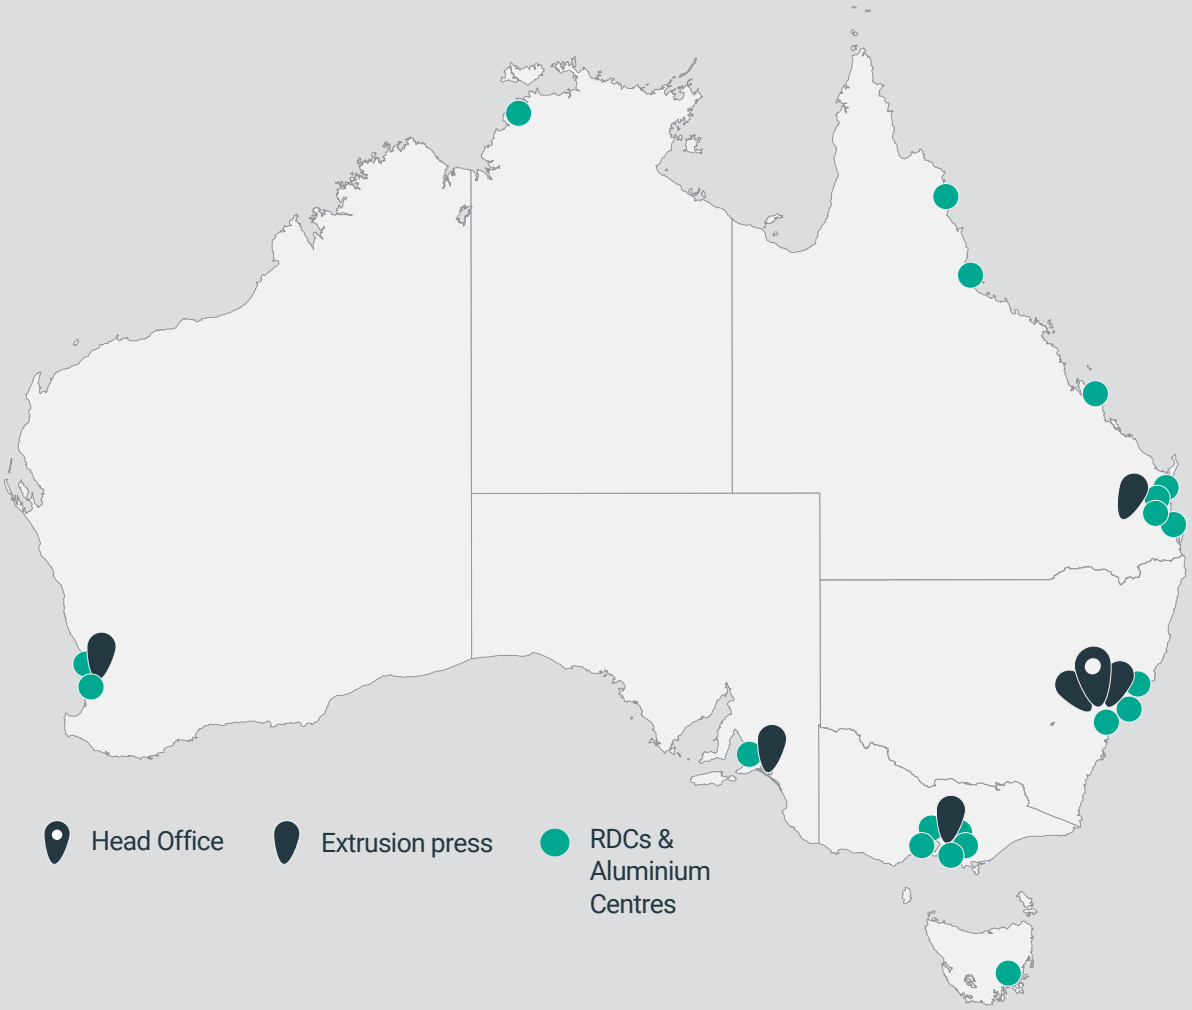

Value-Add Services That Streamline Production

Capral offers a range of in-house value-add services — including cutting, drilling, punching, and CNC machining — designed to support efficient, high-volume modular construction.

By delivering aluminium components pre-processed to your specifications, Capral helps to reduce on-site labour, minimise waste, and accelerate factory production timelines.

Our services are backed by national capability and consistent quality control, ensuring your materials arrive ready for integration.

Lower-carbon Aluminium with LocAl®

Capral's LocAl® range gives fencing and screening manufacturers access to lower carbon aluminium while maintaining the quality, performance and reliable local supply they depend on.

Supported by independently verified Environmental Product Declarations (EPDs), LocAl® provides transparent environmental data that can assist with project specifications, sustainability initiatives and green building requirements.

By specifying LocAl®, manufacturers and fabricators can support efforts to reduce embodied carbon, meet evolving sustainability expectations and deliver projects with greater environmental transparency, all while benefiting from Capral's Australian manufacturing capability and national distribution network.

Certified Sustainability with ASI

Capral is certified to both the ASI Performance and ASI Chain of Custody Standards, demonstrating our commitment to responsible sourcing and sustainable manufacturing.

For fencing and screening, this means access to aluminium that is ethically sourced, fully traceable, and aligned with global ESG best practices. ASI-certified materials support green building standards, ESG reporting, and increasing demands for transparency across the construction industry.

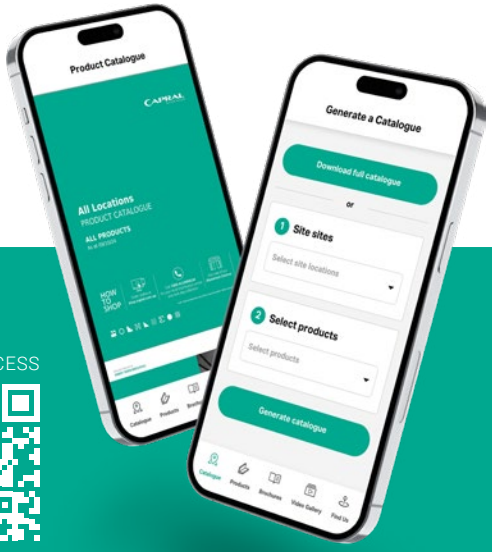

By choosing Capral, you're partnering with a supplier whose sustainability credentials are independently verified and whose materials support your project goals and reputation.

Australian-Made Extrusions

Capral proudly manufactures its aluminium extrusions right here in Australia, supporting local jobs, reliable supply chains, and consistent quality.

For fencing and screening, that means dependable lead times, reduced risk of delays, and confidence in compliance with Australian Standards.

Whether you are using standard profiles or custom designs, you can trust that every extrusion is made to perform backed by local expertise and national reach.
